Goose Latin: How to Speak, Read, and Write

By St Duck & The Goose, select illustrations by St Vacuum III

A Word From The Co-Author, The Goose

Hello my gooselings! I'm quite glad to see that you're interested in one of the official goose languages, Goose Latin! If you read this full book, you will be speaking within just thirty minutes! When I first made Goose Latin, I made sure that it didn't sound like any other languages so gooselings could secretly share their worshipping techniques.

This language is simple to learn for English speakers and is easier for Pig Latin speechmakers. Our mission was to create a simple language that bridges the gap between English and harder languages such as Goseish and Aarya Cjordish. Thank you for purchasing this book, and may the goose be with you.

Chapter One: What is Goose Latin?

Goose Latin is part of the Gooselingo family of languages and jargons and is the easiest to learn. Unlike other members of the Gooselingo, such as Goseish, Goose Latin is considered a patois *(pa-twa)* due to its extreme similarity to English.

Introduced and created in August 2026, it is the newest Goose language. This jargon was designed by The Goose to bridge the gap between English and Goseish. The language is required under Gooseling Criteria and is sometimes known as the 1-1-1-1 language. (one second to understand, one hour to read, one day to speak, one month to become fluent)

This language is mainly taught to newer gooselings ("Goosist Novus", lit. "new gooselings" in Goseish) so that regular gooselings ("Goosist Conditora", "leader gooselings" in Goseish) can communicate in private. It is also often used as a lazier way of encrypted communication when Goseish gets tedious.

Chapter Two: Reading & Writing Goose Latin

Writing Goose Latin is widely considered to be the easiest part of the language among all gooselings alike. Here's how to do it!

- **Step One:** Take an English word "goose"
- **Step Two:** Move first letter to the end "ooseg"
- **Step Three:** Add honk if it's an odd word (if the xth word of the sentence is odd) and add duck if it's the opposite "ooseghonk"
- **Step Four:** Construct a sentence "Ooseghonk atinlduck sihonk oosegduck."

That's it, it's very simple. The best part is, to read, just follow the steps backward as 3-2-1.
For the names of gooselings, omit 'honk' or 'duck' and add 'ling' at the end. Continue the next word as normal.

Chapter Three: Speaking Goose Latin

This is the hardest part of speaking Goose Latin and it is still very easy. This whole language was designed to be simple to learn, so this should be a walk in the park.

There are four rules to speaking Goose Latin aloud:

1. Omit the first letter of 'honk' and 'duck' so it becomes 'onk' and 'uck': 'Oosegonk siuck osonk wesomeauck.'
2. Words addressing gooselings (characterised by the suffix 'ling') **should not be modified at all.**
3. For words starting in vowels, the first letter should be duplicated. (Example: 'Awesomeauck') **This does not apply to the letter "y" or written Goose Latin.**
4. Words starting with "f" **should completely omit the first letter**: "unuck" (fun)
